Dear Hiring Manager,

I'm very interested in becoming a member of your development team. I'm a relatively new developer but in a short time, I've taught myself enough to build two full-stack functioning applications for paying clients and over fifteen small projects. I created a portfolio site to highlight my progress so far, please check it out - www.octojosh.guru.

My true passion is learning and I love challenges, so becoming a developer has been life changing for me. I have devoted 100% of my time to growing my abilities as a developer. Because of this, I'm confident I will meet and exceed most expectations.

Please allow me an opportunity to grow as a part of your team. And in return, I will become an asset to your entire organization.

Sincerely,

Joshua Murphy

Joshua Murphy

Full Stack Developer

My Objectives

My main goal is to continue growing my skills as a full stack developer. So far, I have been limited to solo projects and I wish to become part of your team to gain new experiences.

My Computer Skills

- JavaScript, HTML5, CSS3
- Bootstrap, jQuery, Angular 2
- Node.js, Express, MongoDB
- Webpack, PostCss, Babel
- Git, GitHub, JSON, REST APIs
- Amazon Web Service(AWS), Heroku
- MS Excel, MS Access

My Work Experience

Freelance Web Developer – *Remote*

Dec2016–Present

Job Skills

- Remote communication
- Basic web design
- Production deployment

Freelancing as a web developer has pushed me to learn skills I would have assumed too difficult. However, because I had to deliver a product I found the information I needed and finished the job.

Client Reporting Analyst - *National Field Network*

Jan2017–July2017

Soft Skills

- Team based deadlines
- Client requests
- Time management

As a client reporting analyst, my team and I compiled large CSV files of client data into readable Excel reports. We also queried databases in MS Access to find specific information.

Combat Engineer - *United States Army*

Mar2011–Aug2014

Soft Skills

- Teamwork

- Personal accountability
- Being an adult

Being a Combat Engineer required me to learn demolition calculations, bridge construction, and heavy equipment operations. Teamwork and work ethic are my greatest takeaways.

My Education

Brookdale Community College - *New Jersey*

2015-Present

- Working towards a degree in **Software Engineering**, I plan to transfer to Phoenix University next semester to continue my degree.

Online Courses

2016-Present

- The Web Developer Bootcamp - *Colt Steele. 48hrs*
- Learn and Understand NodeJS - *Anthony Alicea. 13hrs*
- Angular & NodeJS - The MEAN Stack Guide - *Maximilian Schwarzmüller. 8.5hrs*
- Git a Web Developer Job: Mastering the Modern Workflow - *Rob Schiff. 15hrs*

I provide links to my course certifications on my LinkedIn and my personal portfolio.
